

## TURF TYPE PERENNIAL RYEGRASS

Produced in Oregon

American Grass Seed Producers is excited to introduce **Saint** turf type perennial ryegrass. **Saint** is an improved turf type perennial ryegrass developed by Advanta Seeds Pacific. **Saint** has a rich green color with excellent turf quality that has exhibited good resistance to brown patch and dollar spot.

**Saint** is the result of a selection from six maternal lines. The maternal lines were subjected to cycles of selection based on improved genetic color, turf quality, stem rust, leaf texture, and overall appearance and quality.

**Saint** was evaluated in turf plots with Langlois Enterprises. The test plots are in the southern end of New Jersey, near Salem. **Saint's** performance at this location indicates its adaptation to the Northeast, however **Saint** would be an excellent choice in any location where turf perennial ryegrasses are utilized.

Cultivar	Turf Quality	Brown Patch	Dollar Spot
Saint	6.07	7.67	6.67
Affinity	5.82	5.67	5.00
All*Star	3.97	3.67	4.00
Brightstar	5.74	6.33	6.33
LSD	0.49	2.98	1.82

1-9 scale; 9=Best Data from Langlois Enterprises
